

THE LITTLE POOL CO.

INSTANT POOLS • TIMELESS STYLE

LUXURY ABOVE GROUND FIBREGLASS POOLS

FOUR POPULAR POOL SHELL COLOURS TO CHOOSE FROM

AUSTRALIAN FIBREGLASS TECHNOLOGY

Made by world-renowned fibreglass pool manufacturer Compass Pools Australia.

EXTERIOR CLADDING OPTIONS

Fully or partially clad your pool with two different cladding options.

COMPOSITE EXOSKELETON

Allows for simple above-ground installation. No wood or steel is used in the structure of the pool so there is no need to worry about rot, termites or rust.

MINIMAL SITE PREPARATION

Our pools have been specifically engineered to suit almost every site with very little ground work required. All you need is a basic, level concrete pad for the pool to sit on.

HIGH QUALITY FIBREGLASS INTERIOR

Unlike traditional above ground pools, our Little Pools are designed to last a lifetime. No need to replace or reline the interior surface, just keep your water balanced (no concrete to maintain and no liners to replace).

CAN BE INSTALLED UP TO 60CM INGROUND

Need your pool to sit a little lower? You can install your pool partially inground to match existing deck, patio or other slightly raised areas.

PLUG AND PLAY

Your pool arrives pre-plumbed with required pump, filter and equipment, and is ready to fill and use. All you need to do is arrange a power connection.

CHOOSE THE 'NUDE' OPTION IF YOU PLAN TO DECK AROUND YOUR POOL

SWIM ON THE DAY YOUR POOL ARRIVES!

Your Little Pool comes ready to be filled with water, just make sure you have prepared your concrete base and arranged your power connection.

TRANSFORM YOUR BACKYARD

It's never been easier to transform your backyard into a personal oasis...

Click. Prepare. Swim. Yep, that's about as hard as it gets. At The Little Pool Co. we're big on making life simple, which is why we've made it easier than ever before to own a great looking pool without breaking the bank.

With the help of one of Australia's leading pool manufacturers, and the brains of one of the industry's most respected engineers, we've managed to create the ultimate transportable instant fibreglass pool.

The unique non-corrosive composite exoskeleton means that unlike many other fibreglass pools, The Little Pool Co. series can be installed fully above ground. Perfect for smaller sites with limited excavation options.

Gone are the days where getting a swimming pool means having a major construction project in your own backyard. The Little Pool Co. makes it simple. Pick your favourite pool shape, choose your preferred colour, select your ideal exterior finish, then sit back and get ready to swim.

When your pool arrives you barely need to lift a finger. All you need is a level concrete pad and a certified electrical connection, then simply fill your pool with water and jump in. All councils/local authorities have different rules regarding pool fencing. Check local council regulations in your area.

SWIM THE DAY YOUR POOL ARRIVES!

The lightest free-standing high quality swimming pool. Much cheaper to lift into place than concrete or containers.

CHOOSE YOUR POOL MODEL

RELAX RANGE

MODEL	INTERNAL LxWxH	EXTERNAL (INCL. DECKING & CLADDING) LxWxH
6 with beach	6.0m x 2.03m x 1.36m	6.44m x 2.33m x 1.39m
5.2	4.99m x 2.03m x 1.36m	5.42m x 2.33m x 1.39m
4.0	3.75m x 2.03m x 1.36m	4.19m x 2.33m x 1.39m

PLUNGE RANGE

2.8	2.67m x 1.93m x 1.21m	3.11m x 2.24m x 1.24m
3.8	3.67m x 1.93m x 1.21m	4.11m x 2.24m x 1.24m

FAST LANE

10m Lap Pool	10.0m x 2.5m x 1.46m	10.81m x 3.03m x 1.5m

XT Spa	2.5m x 1.5m x 1.14m	2.82m x 2.1m x 1.21m
--------	---------------------	----------------------

**If decking boards not required, dimensions will vary. Contact your local The Little Pool Co. dealer for details.*

Variations in length, width and height may occur due to manufacturing tolerances and customer requirements. Allow a tolerance of +/- 1cm from external measurements.

Standard package includes a pump, filter, LED light, skimmer box and basic pool maintenance kit.

CHOOSE FROM FOUR POPULAR WATER COLOURS

Colour samples are a guide only. These colours are a digital representation and final colour may vary depending on the pool surroundings and the unique manufacturing process.

CHOOSE YOUR EXTERIOR FINISH

Choose a NUDE pool if you plan to deck around your pool

NUDE (NO CLADDING)

Choose to have exterior cladding on 1, 2, 3, or all sides - perfect if you are decking around your pool. Our composite exoskeleton is engineered to support a cantilever deck resulting in savings in construction costs.

MINI ORB™

Mini Orb™ corrugated steel panels create a unique exterior finish. Mini Orb™ panels are available in six Colourbond™ colours.

ALUMINIUM COMPOSITE PANELS (ACP)

ACP panels offer a sleek and modern finish. The clean, smooth surface creates a minimalist finish that allows your pool to blend into any poolscape. Available in 5 different colours.

EXTERIOR COLOUR CHOICES...

MINI ORB COLOURS

MONUMENT® BASALT®

SILVER METALLIC

HERITAGE CREAM

GLOSS WHITE

6.3 Relax with optional porthole upgrade and optional roller cover.

CUSTOMISE YOUR POOL

Put the final touches on your pool to make it perfect for you. Choose from a range of optional upgrades including covers, external steps, heating, lighting, and water management systems. If you have a unique request, simply call us to create a full custom option.

ENTRY OPTIONS

Before you order your pool it pays to consider your landscaping and access plan. How will you access your pool each day? Will you be placing your pool level with existing or new decking? If your pool is going to be a stand-alone feature in your back yard, you may wish to consider the addition of external steps, or simply a stainless steel ladder with handrails.

ACCESSORIES

Want to personalise your pool? There's a whole bunch of upgrades available including multi-coloured LED lights, swim-jets for exercise, heating options and energy efficient pumps. For a real wow factor, why not include acrylic porthole windows in your pool wall? Check out the full range of choices at littlepools.com.au.

COVERS

Whether you're adding heating or not, a pool cover is a sensible addition to reduce evaporation and keep the leaves out. From bubble covers, to manual roller systems, to fully automatic hard covers, there's a solution for everyone.

SANITISATION SYSTEMS

Even though you can manually dose your pool water with granular chlorine or liquid chlorine, there are some great automatic sanitisation systems available, including salt, mineral, or hypoallergenic options.

PREPARING FOR YOUR POOL DELIVERY

CERTIFICATION AND FENCING

All Councils/local authorities have different rules regarding building projects and pool fencing. It is important that you check with your local authority about your requirements. Your Little Pool comes complete with extensive engineering drawings to assist when dealing with Councils or private certifiers. Some regions require independent fencing for above-ground pools.

FREIGHT AND CRANE

All of our Little Pools have been designed to fit perfectly on standard-width trucks, which makes them simple and cost-effective to transport. Due to each customer living in a different location, we do not offer freight-inclusive pricing. In most cases, a crane will be required to unload and place our Little Pools. With our exclusive all-composite construction, they are easier and more cost effective to manage than other heavier options. We are happy to organise freight and a crane (at your cost) or you can choose to self-manage this process.

GROUND PREPARATION

Each pool is designed to sit on a basic, level concrete slab. This ensures that the weight of the pool and the exoskeleton are evenly supported, which is an installation requirement. The concrete slab should be a minimum of 110mm thick, poured on plastic sheeting and reinforced with SL62 mesh. Control joints are not required and there should be no fall on the slab.

ELECTRICAL REQUIREMENTS

You will need to engage a licensed electrical contractor for connection of your pool. The contractor will need to understand Section 6 of the Wiring Rules, and be familiar with equipotential bonding of swimming pools and spa pools as per the Australian Standard Electrical Installations - Wiring Rules (AS3000).
